COMPANY PROFILES

A.virtual

A VIRTUAL CO., LTD. is a leading global venture company at the forefront of AI-driven sterilization technology. Specializing in air sterilization platforms utilizing nano materials, we swiftly introduced innovative products to combat the COVID-19 pandemic, experiencing a remarkable annual sales growth rate of 300%. The strength of our products lies in their remarkable efficiency, boasting a superiority 90 times greater than existing air sterilizers. Our core technology relies on nano-sized Au material with NI coating and advanced photocatalyst, ensuring the elimination of ozone, mercury, and unpleasant odors that can pose significant health risks. Join A Virtual Co., Ltd. in revolutionizing the sterilization industry with our cutting-edge technology, unparalleled efficiency, and commitment to safety. Together, we can create a healthier and safer world. <https://www.avirtual.co.kr/>

LumanLab

LUMANLAB is a pioneering company dedicated to addressing developmental delays through digital therapeutics. Our comprehensive solutions cater to the early childhood cycle, fostering the healthy growth of infants on a global scale. Through the utilization of infant data from diverse countries, LumanLab continuously refines its AI algorithms to deliver enhanced results. We are committed to providing objective online developmental assessment and coaching services to infants worldwide. Our innovative approach eliminates the inconvenience of traditional offline evaluations, replacing them with expert-led online coaching programs. By offering a seamless and accessible service, we effectively evaluate a child's developmental status, ensuring their optimal growth and well-being. Join LumanLab in revolutionizing early childhood development for a brighter future. www.lumanlab.com

BLUE SIGNAL SOLUTION

BLUESIGNAL is a cutting-edge technology company revolutionizing the transportation industry with its groundbreaking "Predictive Driving" technology. By harnessing real-time data from traffic, vehicles, and road infrastructure, our unique ML and AI engine accurately forecasts future traffic conditions. Unlike traditional sensor-based approaches, our solution combines ML, AI algorithms, big data analysis, and transportation theories, enabling us to deliver precise solutions for reducing traffic congestion and accidents. With exceptional cost-efficiency and unmatched accuracy, BlueSignal offers world-class competitiveness in traffic management and information services. Join us in shaping the future of intelligent transportation systems. www.bluesignal.co.kr

E&S Healthcare

E&S HEALTHCARE (E&S) pioneers liquid biopsy and biomarker discovery. Our world's first "Breast cancer diagnostics Kit" is an in vitro diagnostics (IVD) using blood, achieving ISO 13485 certification and CE Mark approval. DxMe® BC kit ensures highly accurate breast cancer diagnosis (96.43% sensitivity, 97.32% specificity). We've also created an exceptional ovarian cancer detection kit, surpassing existing solutions. With user convenience in mind, our fully automated ELISA machines streamline the process. DxMe® BC kit is approved in Malaysia, Serbia, and New Zealand, with FDA 510(k) clearance for breast cancer monitoring pending. E&S brings hope, revolutionizes cancer diagnostics, and empowers women's healthcare. Join us on our journey to a healthier future. <http://ens-h.com/eng/main.php>

Global Neuroscience Company
NeuroVIS

NEUROVIS INC. is an innovative neuroscience research platform company driving advancements in the field. With extensive research experience and technical expertise, we have developed the world's first freely moving animal model using advanced microdialysis technology and cutting-edge mass spectrometry (LC-MS/MS). This breakthrough enables simultaneous analysis of neurotransmitters and metabolites from various biological samples, including the brain and spinal cord. At NeuroVIS, our mission is to lead the development of innovative new drugs by leveraging core drug evaluation technologies. We specialize in understanding the mechanisms of action of central nervous system drugs and evaluating drug efficacy. As a top player in neuroscience, we are poised to expand our global presence. Join us in shaping the future of neuroscience research and driving the development of groundbreaking therapies. Together, we can make a profound impact on improving human health. <http://neurovis.kr/>
